

INFO EXCHANGE

Part of the Alcumus group

keeping your health, safety & environmental processes afloat

We understand the challenges of managing HS&E processes in a 'sea' of UK & EU legislation along with the more recent demands of Corporate Social Responsibility and Carbon Footprint! Key issues are likely to include:

- Changing legislation and business conditions
- Multiple site locations and a mobile workforce
- Maintaining compliant processes and procedures
- Maintaining accurate data and trend analysis
- Consolidation of multiple data sources
- Delivering a 'single view of the truth'!

We can help you towards calmer waters!

We recognise that 'one size does **not** fit all' and every business needs the flexibility to manage HS&E processes and information in a way that works for them! We also recognise the problems caused by local spreadsheets, databases and hybrid 'forms' leading to disparate and inconsistent data capture and reporting.

By understanding your specific requirements and using our efficient web based **Info Tracker** software we rapidly build 'tailored', user friendly and cost effective HS&E data management solutions. **Info Tracker** also includes powerful search, reporting, email notification and workflow functionality.

What sort of HS&E processes can be managed?

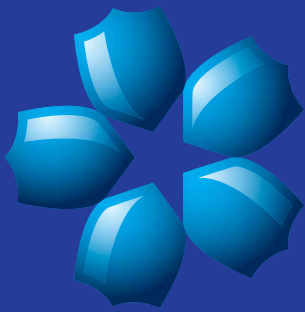

Clients are applying Info Tracker to deliver a multitude of HS&E processes, including, but not limited to:

- Injury Accidents
- Claims tracking
- H&S KPI's
- MAIB reports
- Statutory Visits
- H&S Plans
- Near miss reporting
- Waste tracking
- Investigations/actions
- Sustainability/carbon footprint
- Riddor reports
- Non compliance tracking
- Asbestos records
- Occupational health
- Environmental incidents
- Audits/inspections
- Defect tracking
- Training records
- Safety culture assessment
- Risk assessments.

"It is probably the best health and safety software solution in the world!"
